

Hello

My name is Valentina Vargas, i am in the virtual modality software analysis and development program.

My instructor is Jeimmy Calderon

And today I present the audio activity.

I am a person who is focusing on the study of software analysis and development, with a career in multimedia design and integration, providing services and solutions in web page design.

Technical studies in the systems have provided prior knowledge to solve software problems.

I am currently acquiring more knowledge in the area of technology, and if I continue with this learning process I will be able to aspire to a professional position in the area.

Finally, I can say that if I graduated as a software analyst and developer SENA technologist.

Thank you

Good bye.
