

**Program:**  
Systems analysis and development.  
**SENA**

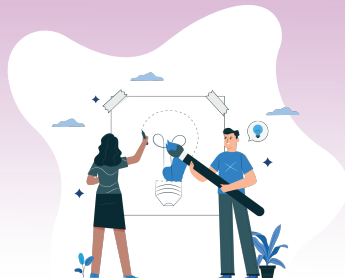

## About the program.

Design of web or mobile applications

The program solves problems or needs.

**Steps**  
I follow to develop a  
software.

1. I select a method.

2. I collect requirements.

3. I create a model.

4. I choose or create an architecture.

5. I create code.

6. I run test.

7. I manage configuration.

8. I put the software into practice.

9. I transfer the data to the software.

**I am**  
**Valentina**  
**Vargas**  
**Sanchez**

## About me:

- I like programming.
- I have studied similar things before.
- I learned about the programming through SENA.

## Expectations:

- I want to finish my learning process
- I want to complement my knowledge
- And I want to learn new things
