Hello

My name is Valentina Vargas, i am in the virtual modality software analysis and development program.

My instructor is Jeimmy Calderon

And today I present the audio activity.

I consider myself a responsible person in the field of study, currently I have to study specific topics to complement my knowledge in programming languages, as well as a hobby or personal project I try to practice my digital drawing to improve it and now I study with SENA virtually, That is why my obligations are that I must be self-taught and responsible.

Thank you

Good bye.
